

## DEVELOP YOUR PEOPLE WITH PERSONALISED LEARNING

Stream LXP enables your organisation to deliver on the promise of a true 'learning culture' by delivering learning experiences that drive the behaviours needed today whilst building the skills that are needed to succeed tomorrow. **It does this by being simple, smart and social.**

### **Stream LXP is simple**

Overwhelmed, time poor learners want mandatory learning experiences done with a minimum of fuss and need self-development opportunities highlighted quickly and easily.

Delivered as a 'Netflix'-style experience, Stream LXP engages users from the first moment, becoming your organisation's hub for learning and personal development.

### **Stream LXP is smart**

Competition for attention is extremely high. In order to keep learner focus, we need to be present in their workflow and make relevant recommendations.

Through the smart use of automation, deep search, and mobile learning, Stream LXP allows learners to learn in the flow of work with personalized, timely recommendations and assigned learning.

### **Stream LXP is social**

The skills that we need more of today - the ones that can't be replaced by machines tomorrow - are all about people. And people learn from people.

Stream LXP incorporates social elements that promote a culture of peer-to-peer learning. Our range of unique reporting tools allow you to visualise where change is really taking place across the organisation.

### **The behaviours you need today and the skills you need tomorrow**

Stream LXP gives the power to deliver personalised streams of expert content and curated experiences, for what's needed today and tomorrow.

Out of the box self directed learning can be quickly and simply enhanced by experts in your organisation.

Stream LXP makes it simple for your company to deliver on the promise of a true 'learning culture', enabling self-directed learners to help themselves and offering a platform for your subject matter experts to deliver programmes at scale.
