

# Moodle™ 3.7 Now Available!

Upgrade your Remote Learner site to the latest version to maximize your impact

The latest Moodle release contains a number of intuitive, impactful features that address the needs of administrators, instructors, and students alike. Remote Learner has vetted this release to ensure stability, security, and compatibility with your site.

## Key Changes for Instructors

**More forum control:** Instructors can add a private reply in a forum and can manually lock discussions.

**More messaging control:** Instructors can delete messages from users in group conversations.

**Course custom fields:** Custom fields in the course settings may be added to provide extra information and improve searching.

**Competencies as a criterion:** Badges may now be awarded based on competencies and competencies may be graded when grading activities.

## Key Changes for all Users

**Inline forum editing:** MUA-funded improvements to the Forum activity include adding and replying to discussions online.

**Improved messaging interface:** Messaging enhancements include a link to a full page, 2 column view and the ability to mute conversations

**Add media in an essay:** Attach files such as images or record sound/video when answering an essay question

**Competencies and learning plans:** Filter competencies by activities from the link in the navigation drawer and view related learning plans.

## Key Changes for Administrators

**Analytics enhancements:** Learning Analytics have been improved to increase usability and efficiency.

**Test emails:** A new setting allows administrators to easily test outgoing mail configuration.

**Hide course lists:** New capabilities allow administrators to define who can see lists of courses in various categories.

**Enhanced messaging:** Messaging settings are in a new site administration category.
