

# LEARNING LOCKER® LRS

## The world's most installed Learning Record Store

Learning Locker® helps you to figure out what works when it comes to learning in your organization.

Learning Locker® allows internal L&D professionals to combine learning data, evaluation data and business data into a single dashboard to undertake detailed analysis of learning programs and optimize for impact, engagement and efficiency. Without the need for code or complex BI tools, Learning Locker® is the simplest way to enable Learning Analytics in your company.

For digital learning architects, Learning Locker® enables next generation learning ecosystems, offering an open, enterprise-level of integration between different tools and technologies. Learning Locker® is the only Learning Record Store that gives you complete flexibility in deployment - available Enterprise or Open Source, in the cloud, or on-premise.

## Features

Learning Locker® comes with a number of powerful features:

### Multiple stores, one installation

Learning Locker® comes multi-tenant enabled, allowing you to set up multiple stores within Learning Locker® to collect xAPI according to different data source and storage requirements.

### User segmentation

Learning Locker® has a complete API for storing and reusing valuable user information that can be used to slice and dice xAPI data into ad-hoc groups and reporting.

### Shareable dashboards

Offer a great way to share the results of your learning analytics with the rest of your business - without the need to create and support lots of users.

### API-driven

Take complete control over Learning Locker® through our powerful (and very well documented) APIs.

### Automated indexes & suggestions

Learning Locker® is designed to cope with any xAPI data you can throw at it, even if it's something we've never seen before.

### Waves

Waves is a Learning Pool tool that uses statements to create learning campaigns, trigger follow on actions, deliver personalized pathways and automate workflow.

### Templates

As well as a fully customizable query builder, Learning Locker also comes with a range of pre-built templates that allow you to create one-click dashboards that can answer questions you have about your data without the need to have any prior knowledge of how the system works.

### Assessment analysis

Out of the box visualizations that help you dive into detail of your assessment results and take action to improve the quality and structure of the content you provide to your learners.

# Enterprise app store

Power-up your Enterprise Learning Locker® with our exclusive range of apps. We've got tools to help integrate with your existing tech stack, to help automate business processes or to take your analysis to the next level.

Just a selection of the apps available for Enterprise clients:

## BI-connector

If your organisation uses a Business Intelligence tool like Tableau or PowerBI, the BI Connector allows you to feed your BI tool with a real-time data stream from Learning Locker®.

## Journeys

Our Journeys feature allows you to map out your learners' experiences through any and all of your connected systems.

## GDPR

A central administration tool for organizations seeking to comply with GDPR.

## Integration pipeline

Use the Integration Pipeline to connect all your non-xAPI systems together to create a single source of record for all your learning analytics. This includes tools such as Cornerstone on Demand, SurveyMonkey, Yammer and Degreed.

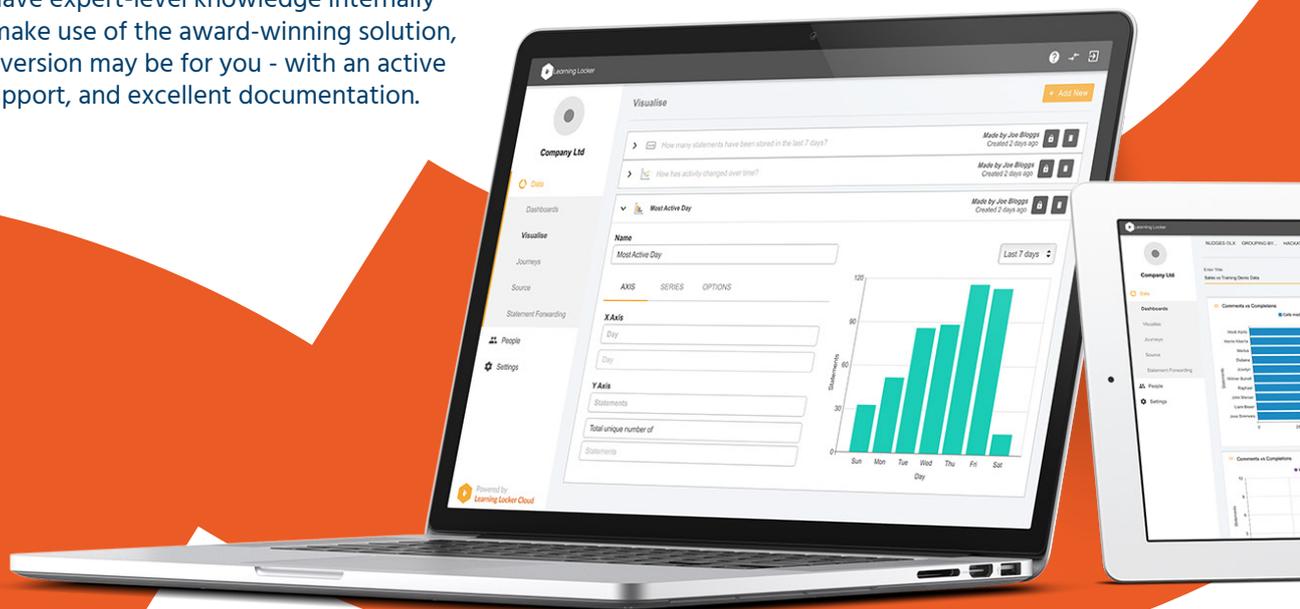

## Statement forwarding

Learning Locker® has the ability to automate the connection to other external platforms based on easy to set up rules, enabling you to trigger new actions or completions in platforms that would otherwise be unaware of activity elsewhere.

## Do it yourself

Our Enterprise version of Learning Locker® and its range of additional apps is designed to help you get the most out of your data. You will be well supported and have access to all the expertise you need to get the most out of the system.

However, if you have expert-level knowledge internally and just wish to make use of the award-winning solution, our Open Source version may be for you - with an active community for support, and excellent documentation.
